YASHU ARORA

(412) 816-7738 | yashuaroraworks@gmail.com | Personal Portfolio | LinkedIn | Fort Lauderdale, Florida

End User Computing product manager with 7+ years in enterprise virtualization, cloud, and SaaS. Built Citrix Virtual Desktop Assistant from 0 to 1: self-service audio, video, USB, keyboard, screen capture, and network diagnostics inside the HDX session that cut support cases 30% across 43 customers. Turns device and protocol complexity into one-click experiences for millions of users.

[EXPERIENCE]

CLOUD SOFTWARE GROUP (CITRIX) — Fort Lauderdale, USA

Senior Product Manager *– CVAD/DaaS* — *(6/23-Present)*

- **0-to-1 Product:** Launched Citrix Virtual Desktop Assistant, Citrix's first self-troubleshooting app for end users, reaching 4M+ users by default on every single- and multi-session VDA, by defining the vision, MVP, and roadmap from scratch with engineering and design.
- **Support Deflection:** Reduced customer support cases 30% across 43 customers on the latest build, by turning top ticket drivers into one-click fixes (CPU prioritization, memory reclamation, hung-app termination, storage cleanup, network quality ratings) and cutting escalation evidence-gathering to one click with snipping of redirected content (Browser Content Redirection, optimized Teams), MP4 session recording, and Always-On Tracing log bundles.
- **Devices & Peripherals:** Made 4 device classes and 5 USB redirection states self-diagnosable inside the HDX session, by defining audio (mic/speaker, test tone, recording), webcam, keyboard/IME layout sync, and USB checks that flag missing drivers and policy blocks and export diagnostic bundles for IT.
- **Adoption:** Grew usage to 112K+ sessions from 5.2K+ users, including 38K+ on Windows Server multi-session VDAs, by extending support across Windows 10/11 and Windows Server 2019–2025 VDAs.
- **Fleet Upgrades:** Replaced manual VDA patching with self-serve upgrades across 4 release tracks for commercial and Government cloud customers, by defining requirements and prioritizing the roadmap for VDA Upgrade Service (ring-based rollouts, failure thresholds, restore-point rollback, forced logoff) and partnering with security on FedRAMP-ready network requirements.
- **Platform Growth:** Grew App Packaging adoption 95% YoY two years running, with 100 customers delivering 2,000+ apps to Citrix endpoints, by shipping 8 Web Studio features including 2 partner integrations and 6 new package types.
- **Resilience & Migration:** Saved customers millions in third-party disaster recovery and moved 500+ customers between Citrix Cloud and on-prem, by launching Backup and Restore and Policy Sets and owning the migration tool roadmap.
- **Policy & Identity:** Secured multi-million-dollar renewals with healthcare and finance customers, by extending Citrix policies to Entra ID and other identity providers with client-type filtering, based on persona research.

AMAZON.COM, INC. — Seattle, USA

Senior Product Manager Technical, Intern *– Time and People Innovation* — *(6/22-8/22)*

- **Customer Focus:** Defined benefits self-service features targeting ~70K fewer hours of inquiry calls a year, by running user interviews and voice-of-customer analysis to isolate the biggest friction points.
- **Product Strategy:** Built a launch-ready plan for a frictionless, localized time-off experience for 1.62M employees, by writing the PR/FAQ, designing Figma prototypes, and aligning stakeholders on a phased global rollout.

BLACKROCK — Gurgaon, India

Product Manager — *(11/20-7/21)*

Associate Product Manager — *(8/17-11/20)*

- **Remote Workforce:** Kept 16K+ employees productive through COVID-19 remote work and return to office, by partnering with 4 risk, compliance, and platform engineering teams to rebuild intranet remote login.
- **Platform Re-engineering:** Saved ~$5M and cut processing time 48%, by re-engineering a resource planning application with a database redesign, reworked REST APIs, and front-end user feedback.
- **Quality & Reliability:** Cut crashes 30% and improved retention for 2 mobile apps (~11K users), by building a root-cause analysis program driven by customer feedback.

[EDUCATION]

CARNEGIE MELLON UNIVERSITY, TEPPER SCHOOL OF BUSINESS — Pittsburgh, USA

Master of Business Administration - MBA (STEM Designated) — *710/800* — *(5/23)*

- Concentrations: **Business Technologies, Marketing, Strategy, Entrepreneurship**
- Leadership: Business and Technology Club (Advisory Board), South Asian Business Association (VP, Marketing)

THAPAR UNIVERSITY — Patiala, India

Bachelor of Engineering in Computer Engineering — *8.26/10* — *(6/17)*

[ADDITIONAL INFORMATION]

- **EUC & Technical:** Citrix Virtual Apps and Desktops/DaaS, HDX and virtual channels, audio/video/USB redirection, Windows and Server VDAs, Studio policies, Entra ID, SQL, Python, Splunk
- **Product Tools:** Jira, Confluence, Figma, Tableau, Google Analytics, A/B testing
